MEMORANDUM FOR GENERAL SIBERT

SUBJECT: Documents from Goebbels Files (Propaganda Ministry)

1. Attached State Department Memorandum, which results from an inquiry of yours of more than a year ago, is an indication of the type of document contained in the files of the Propaganda Ministry. The list of documents is overclassified by the French authorities and the State Department, since not one of the documents listed seems to be of current intelligence value. The majority of documents listed are routine copies of material already exploited, or information actually published during the war, such as the daily communiques.

2. This list should not be taken as an indication of the overall files of Goebbels' outfit. It is possible that the French are holding back documents of particular interest. The Propaganda Ministry documents are, however, less likely to be of current interest than those of the foreign office or files of the Reichsminister for Occupied Eastern Territories.
